

Male Breast Cancer Awareness Week October 14 -20, 2012

Men are susceptible to Breast Cancer

Symptoms:

- A painless lump or thickening in the breast tissue
- Changes to the skin covering the breast such as dimpling, puckering, redness or scaling
- Changes to your nipple, such as redness, scaling or an inverted nipple
- Discharge from your nipple

When to see a doctor:

Make an appointment with your doctor if you have any persistent signs or symptoms

“Early Detection is the Key to Survival”
